7th Workshop on Hyperspectral Image and Signal Processing :  
Evolution in Remote Sensing

**2-5 JUNE 2015, TOKYO, JAPAN**

Workshop Program

伊藤国際学術研究センター  
ITO INTERNATIONAL RESEARCH CENTER

東京大学  
THE UNIVERSITY OF TOKYO

**w h i s p e r s**

2015  
Tokyo, Japan

## 1. FOREWORD

It is with great pleasure that the University of Tokyo is hosting the 7th Annual IEEE WHISPERS in Japan.

More than 150 papers are submitted from all over the world. We wish to appreciate Jocelyn Chanussot and Naoto Yokoya, the program chairs, for the arrangement of all the peer reviews and completion of an excellent technical program. We also would like to thank all the reviewers, who carefully dedicated their efforts and time to improve the manuscripts, although we have an earlier schedule in this year to avoid the rainy season in Japan.

As is the tradition with WHISPERS, prior to the technical program, we have a tutorial on the rapidly growing topics in hyperspectral community. We would like to express our deepest gratitude to José Manuel Bioucas Dias for lecturing inverse problems in hyperspectral imaging.

The three days of technical program with two parallel sessions follows the tutorial. We are grateful to three plenary speakers, Yoshio Inoue, Lori M. Bruce and Bing Zhang, who show us the outstanding works in the hyperspectral research. In addition to the traditional hyperspectral topics, such as unmixing, classification, sensor design, planetary exploration, target detection and atmospheric correction, new topics on hyperspectral pansharpening, big data and various applications further enlarge a diversity of the hyperspectral community. Since several hyperspectral missions are going in space in the coming five years, the application studies of spaceborne hyperspectral imaging will direct you to the evolution of global contribution. We would like to thanks for the organizer of the special sessions.

This workshop is held by the back up of Ito International Research Center Conference. WHISPERS are also supported by the industry of hyperspectral instruments and software as well as public organizations. Please visit the exhibitors to feel the latest technologies that will lead to new scientific findings.

During your stay, we hope you will find and enjoy the various faces of Tokyo, historical and traditional places, Japanese culture (subculture) and modern attractions.

Thanks again for participating in WHISPERS 2015.

Akira Iwasaki

## 2. EXHIBITORS

HySpex, NEO's line of hyperspectral cameras, aims to offer compact, high performance and versatile instruments for a multitude of applications, ranging from airborne to laboratory and industrial use of imaging spectroscopy. Norsk Elektro Optikk AS (NEO) was established in 1985 as a privately owned research oriented company within the field of electro-optics. NEO has grown to be the largest independent research and development organization in electro optics in Norway, and has in addition established itself as a manufacturer of advanced electro optical products for an international market.

<http://www.hyspex.no>

Headwall is a global manufacturer of multispectral and hyperspectral imaging sensors for use in a wide range of remote sensing applications. Mounted aboard earth-orbiting satellites, fixed-wing aircraft, or UAVs, Headwall's sensors are small, light, and highly precise. Outstanding hyperspectral imaging performance is achieved thanks to aberration-corrected optics, which deliver high spatial and spectral resolution within a very wide field of view.

New for 2015 are three sensors designed for remote sensing applications. Nano-Hyperspec® is a lightweight and compact VNIR (400-1000nm) sensor suitable for small, hand-launched UAVs that combines integrated data storage and direct-attached GPS. Second is Headwall's wideband VNIR-SWIR sensor that covers the 400-2500nm spectral range and features co-registered pixels for outstanding image clarity and resolution. Third, Headwall offers a new high-resolution fluorescence sensor for precise environmental monitoring research that specifically targets the 754-775nm range in a small and lightweight package. Headwall is ISO-9001:2008-certified and operates from manufacturing facilities in the United States and Europe.

<http://www.HeadwallPhotonics.com>

ASD Inc., a PANalytical company, is the global leader in remote sensing and hyperspectral measurement solutions, providing unparalleled ground truthing results. Our rugged, portable FieldSpec® 4 line of spectroradiometers provides the freedom to rapidly collect high-quality spectra in the field. Trusted by top research experts at thousands of universities and research institutions, ASD's full-range spectrometers are used in more than 70 countries.

<http://www.asdi.com>

ImageONE is a distributor of ASD products in Japan.

<http://www.imageone.co.jp>

Visual Information Solutions

**Exelis VIS K.K.**, a business unit of Exelis Inc. offers world-wide academic, commercial and government customers in Defense, Intelligence, Earth and Space Science and Aerospace areas with one of the widest ranges of capabilities in the image capture, and remote sensing industry. Exelis Inc. even offer image sensor of IKONOS, QuickBird, GeoEye-1/2, WorldView-1/2/3, MTSAT-2, and Himawari 8 as well.

We started to offer enterprise solution products such as ENVI Services Engine (ENVI in Cloud) and Jagwire.

**ENVI** leading and standard hyperspectral image processing software with atmospheric correction option module for hyperspectral/multispectral images. Equipped wide range of spectral libraries with sophisticated function such as Linear Spectral Unmixing and Spectral Angle Mapper.

**SARscape** developed by sarmap SA. Option module of ENVI, processing SAR data which is easy to use GUI based software with Workflow function.

**ENVI Services Engine** Cloud-based image analysis solution lets your organization create, publish, and deploy advanced ENVI image and data analytics to virtually any existing enterprise infrastructure.

**Jagwire** Not just geospatial data management, Data management plus DECISIONS.

Cloud-based solution that enhances situational awareness by providing geographically spread teams with on-demand access to critical geospatial (intelligence) data. Jagwire reduces the time from data collection to decision making through a flexible platform that can be accessed from the cloud, mobile devices, and desktops

<http://www.exelisvis.com>

Japan Space System (J-spacesystems) is a total solution provider in the space activities to promote the space utilization such as development of space systems from space segment to ground segment and research & development of application for the remote sensing satellite. J-spacesystems promotes HISUI project is a spaceborne hyperspectral imager mission.

<http://www.jspacestems.or.jp/en/>

ARGO is a distributor of hyperspectral and multispectral imaging sensors for Japan.

First New for 2015 are three sensors designed from HeadWall Photonics for remote sensing applications. Nano-Hyper-spec is a lightweight and compact VNIR (400-1000nm) sensor suitable for small, hand-launched UAVs that combines integrated data storage and direct-attached GPS. Second is Headwall's wideband VNIR-SWIR sensor that covers the 400-2500nm spectral range and features co-registered pixels for outstanding image clarity and resolution. Third, Headwall offers a new high-resolution fluorescence sensor for precise environmental monitoring research that specifically targets the 754-775nm range in a small and lightweight package.

Second new is a real time hyperspectral solution from IMEC. The newly developed mosaic sensors feature one spectral filter per pixel, arranged in mosaics of 4x4 (16 spectral bands) or 5x5 (25 spectral bands) deposited onto a full array of 2 Million pixels 5.5 micron size CMOSIS CMV2000 sensor. Two versions of the mosaic hyperspectral image sensors have been developed:

one 4x4 mosaic with 16 bands in the 470-630nm (visible range)

one 5x5 mosaic with 25 bands in the 600-1000nm range (Visible-NIR range)

Imec's hyperspectral imaging sensors (100bands linescan, 32bands tiled and 16/25bands mosaic designs) are off-the-shelf, commercially available now.

**KLV CO., LTD.**

KLV has known as one of the top maker of light sources, optical parts and optical products. We also have supported and developed many optical fields such as medical, bioscience, agriculture, environment, and food for past 30 years in Japan. Now, we are going to new direction as "solution for optical system demands". We provide the best optical solutions to customers. KLV is a dealer of Norsk Elektro Optikk AS (NEO) products in Japan.

<http://www.klv.co.jp/eng/eng.html>

**北海道衛星株式会社**

**Hokkaido Satellite Co., Ltd.**

Hokkaido Satellite Corp. Ltd. was established to create a new space business of agricultural remote sensing for precision farming from Japan. Hyperspectral sensor is the key technology for advanced sensing because of its analytical ability. We also developed spin-off products such as "Hyperspectral Camera". We serve to promote the space industry and related businesses for global prosperity.

Telops, located in Quebec City, Canada, specializes in the design and production of sophisticated opto-electronic systems for the defence & security, environmental and scientific research markets. Telops advanced optical systems allow the detection and identification of remote substances which are often invisible to the naked eye.

In addition to providing specialized opto-electronic engineering services, Telops has also developed the Hyper-Cam, an infrared hyperspectral imager which allows standoff chemical detection at a distance of up to five kilometers. This advanced instrument enables its user to measure different spectrum and then compare the measured spectrum with the signatures of known gases and solids. The constituents and properties of a target can then be easily identified. As well Telops has developed a high performance line of infrared cameras which includes unique cameras, custom designed for specific applications. This line includes the FAST-IR comprised of two different rapid frame rate infrared cameras, the HD-IR which includes high-definition infrared cameras, the MS-IR which offers unique, multispectral capabilities, the HDR-IR, a high dynamic range camera which allows users to resolve scenes up to 2500°C and finally the TS-IR, a versatile, easy to use infrared camera which comes in an IP67 sealed enclosure making it ideal for use in harsh environments.

Telops also offers R&D services for optical system technology development. Telops experts deliver significant expertise in the fields of opto-electronic systems engineering with full disciplinary specialist in optical, mechanical, electronics, thermal, software and system engineering. Telops works closely with its clients/scientists to develop customized optical solutions in the area of infrared remote sensing, spectrometry, cryogenic and ruggedized optical systems as well as dedicated imaging and calibration systems.

**CORNES**  
**Technologies**

Cornes Technologies is a leading specialist importer and distributor of electronic devices, systems and equipment, scientific equipment, and industrial machinery, with unrivalled experience in the promotion, marketing and selling of new products and technology sourced from overseas to a broad range of customers in Japan.

<http://www.cornestech.co.jp/en/>

### 3. SPONSORS

Since its establishment in October 1988, the Support Center for Advanced Telecommunications Technology Research (SCAT) has been engaged in the development of info-communications technology by reviewing and surveying advanced technologies, funding for R&D projects, and providing information on advanced technologies. SCAT intends to continue its active supports for further promotion of R&D in the info-communications technology areas.

## 5. COMMITTEES

### General Chair

Akira Iwasaki, University of Tokyo, Japan

### Program Chairs

Naoto Yokoya, University of Tokyo, Japan

Jocelyn Chanussot, Grenoble Institute of Technology, France

### Organizing Committee

Kuniaki Uto, Tokyo Institute of Technology, Japan

Tetsushi Tachikawa, Japan Space System

Satomi Kakuta, Japan Space System

Taichi Takayama, University of Tokyo, Japan

### Technical Committee

Peter Bajorski, Rochester Institute of Technology, USA

Jon Atli Benediktsson, University of Iceland, Iceland

Jose Bioucas Dias, Technical University of Lisbon, Portugal

Xavier Briottet, ONERA, Toulouse, France

Lorenzo Bruzzone, University of Trento, Italy

Melba Crawford, Purdue University, USA

Sylvain Douté, Laboratoire de Planétologie de Grenoble, France

Jenny Q. Du, Mississippi State University, USA

Peijun Du, Nanjing University, P.R. China

Bethany L. Ehlmann, Caltech, USA

Paolo Gamba, University of Pavia, Italy

David Goodenough, University of Victoria, Canada

Bormin Huang, University of Wisconsin-Madison, USA

Xiuping Jia, Australian Defence Force Academy, Canberra, Australia

Alexandre Jouan, Defence Research and Development, Canada

John Kerekes, Rochester Institute of Technology, USA

Sebastian Lopez, Universidad de las Palmas de Gran Canarias, Spain

Erzsébet Merényi, Rice University, USA

Muhammad Murtaza Khan, NUST-SEECS University, Pakistan

Nasser Nasrabadi, U.S. Army Research Laboratory, USA

Mario Parente, Brown University, USA

Antonio Plaza, University of Extremadura, Spain

Ils Reusen, VITO, Belgium

John Richards, The Australian National University, Australia

Stanley Rotman, Ben-Gurion University of the Negev, Israel

Alan Schaum, Naval Research Laboratory, Washington, D.C., USA

James Theiler, Los Alamos National Laboratory, USA

Jean-Yves Tournet, IRIT Laboratory, Toulouse, France

Miguel Velez-Reyes, University of Texas at El Paso, USA

Peter White, CCRS-CCMEO-NRCAN, Canada

Alina Zare, University of Missouri, USA

Bing Zhang, Center for Earth Observation and Digital Earth, China

### Webmaster & Graphic Designer

Vincent Couturier-Doux

## 6. CONFERENCE INFORMATION

### Arrival to the Conference Venue - IIRC, University of Tokyo :

- **By public transportation**  
The easiest way to reach the venue from the city is the Tokyo Metro Marunouchi Line or the Toei Oedo Line (see the access map). For detailed transportation information, see the website: <http://www.ieee-whispers.com>. Follow menu to 2015 INFOS >> Transportation. The Ito International Research Center (IIRC) is 500m from the metro stop “Hongo-sanchome” (see map of the venue location).
- **Once there**  
The IIRC is located next to Akamon (the Red Gate). Enter the IIRC by the Ito Hall’s entrance with the WHISPERS signboard, descend two levels to the ground floor and you’re there.

### Registration desk :

- Location: Main Foyer area at the Ito International Research Center, on the second basement level (see map of the IIRC). Exception: 12h30-18h on Tuesday 2nd, the desk is on the third floor.
- Hours :  
Tuesday 2nd : 12h30 – 18h30  
Wednesday 3rd – Friday 5th : 9h – 18h.
- Onsite registration and/or extra banquet ticket: cash only

### Internet :

- Free Wi-Fi is available in the whole building and its password will be provided on-site.

### Speaker Preparation :

- Software: Each lecture hall (Ito Hall and Gallery 1, see map of the IIRC) is equipped with Office and Acrobat reader.
- File types: We accept .ppt, .pptx or .pdf formats.
- Loading your presentation: Please go to the appropriate lecture hall (Ito Hall and Gallery 1) to upload your presentation BEFORE the start of your session. A Whisperer will be there to assist you as needed.

### Poster sessions :

- Set-up: Please arrive each day before your session to set-up your poster. Whisperers will be there to assist you.
- Break-down: Please remove your poster at the end of the day, to free the spot for the next day’s posters.
- Presentation: speaker should be alongside the poster during the poster session and the coffee breaks.
- Size: max posters size is A0 (841 × 1189 mm).
- The posters sessions will be held in the Event Space in front of the Ito Hall (see map of the IIRC).

### Tutorial :

- Location: Seminar Room at the Ito International Research Center, on the third floor (see map of the IIRC).
- Hours:  
Tuesday 2nd, 13h30 – 17h

**Social Events:****Tuesday 2nd, from 19h: Ice breaker @ Ito International Research Center (IIRC)**

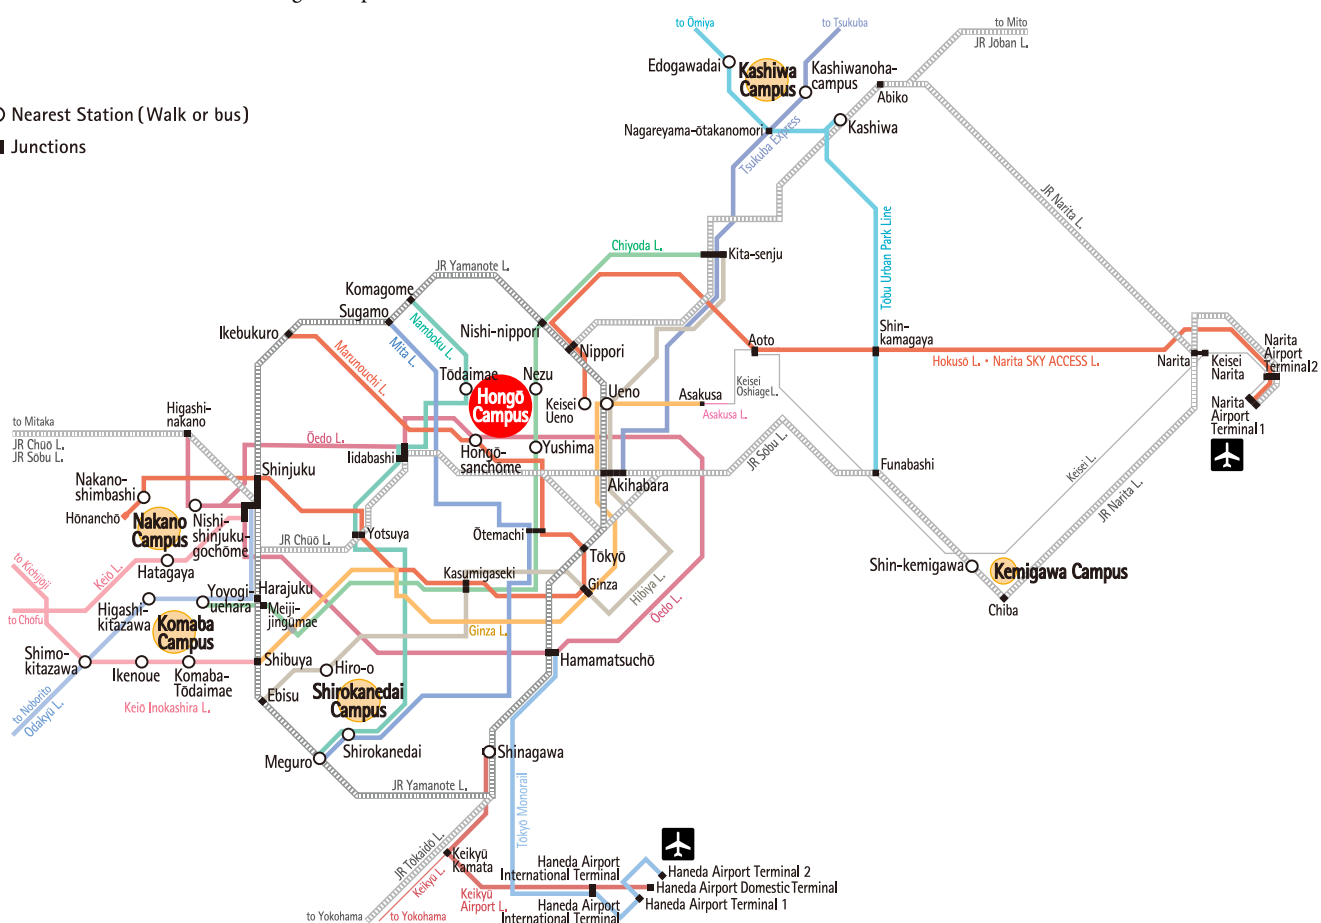

- The ice breaker will take place at the Event Space of the Ito International Research Center, the conference venue (see map of the IIRC).
- The event will feature Japanese and Western harmonized cuisines and live music.
- The participation to the ice breaker is included in the registration cost.

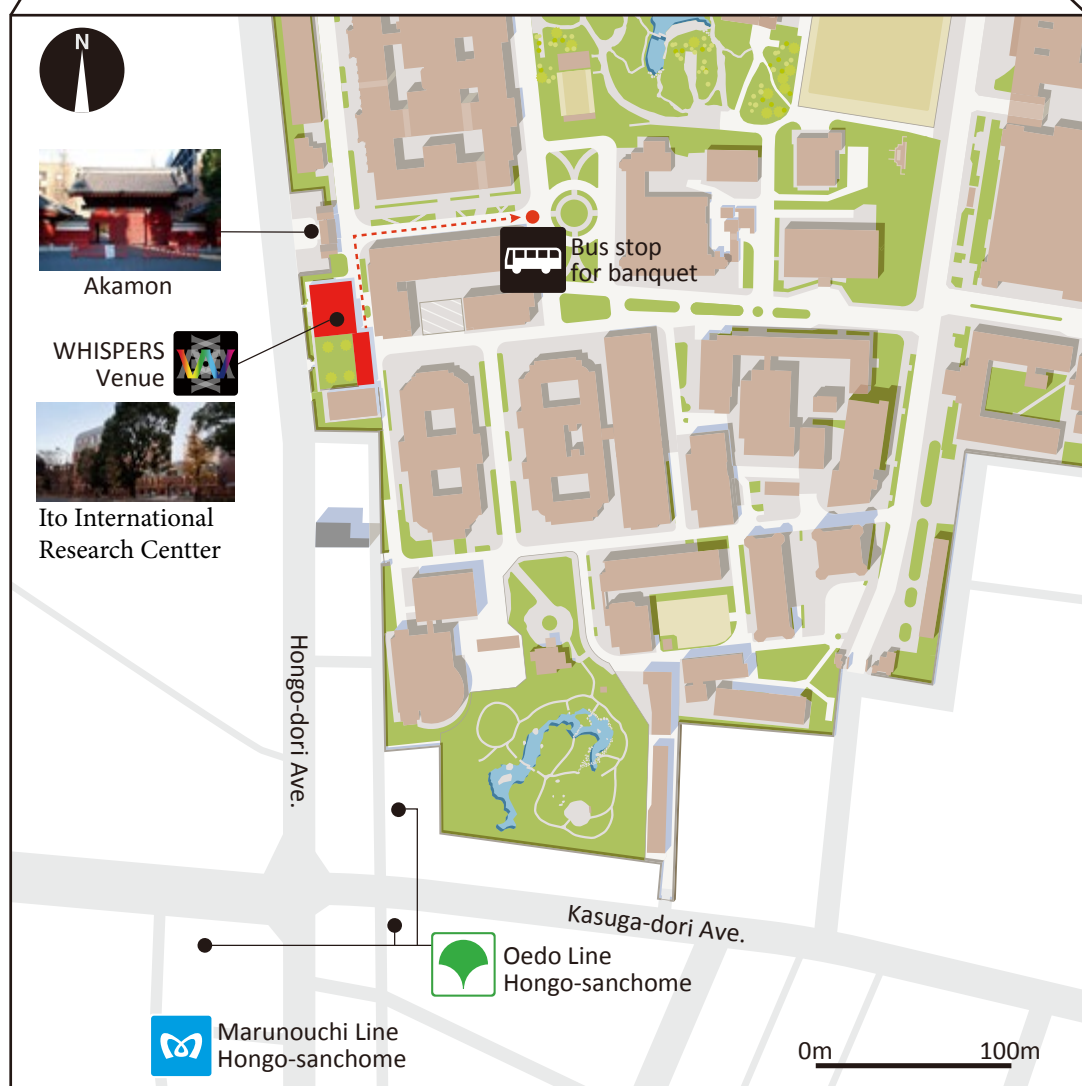

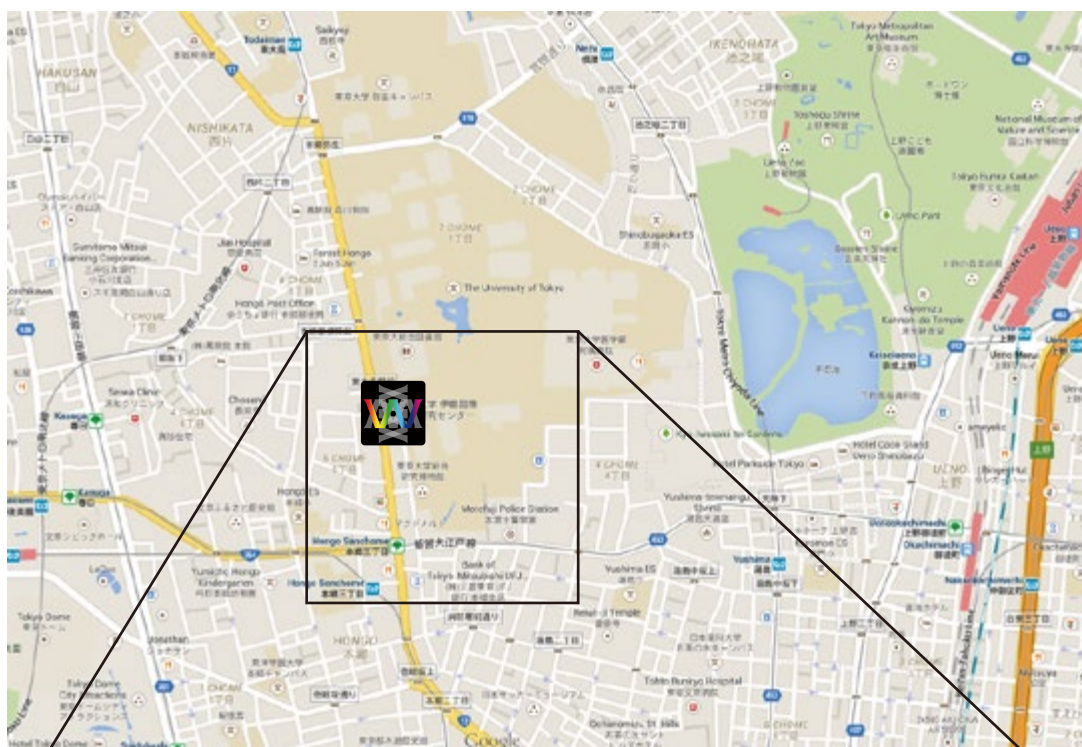

**Thursday 4th, from 18h30: Banquet @ Hotel Chinzanso Tokyo**

- The banquet will take place at Hotel Chinzanso Tokyo, the five-stars hotel with a luxury garden oasis in the heart of Tokyo. The gardens were formally established in 1861, in what we called the Meiji era, but it is said this area was already appreciated as beautiful camellia hills with a long history dating back some 700 years. The banquet place will be the Orion Banquet Hall overlooking the vast Japanese garden.
- The event will start with an aperitif followed by a special buffet dinner with traditional Japanese music.
- The participation to the banquet is included in the registration cost.
- We will move by bus to reach Hotel Chinzanso Tokyo from the conference venue. Buses will leave from the nearest rotary at 18:00 pm (see map of the venue location), and come back to Akamon at 22:15 pm from the parking area of the hotel. Whisperers will be along the way to guide you.

Access Map to University of Tokyo  
WHISPERS 2015 Venue is at Hongo Campus

14:40	DETECTION OF SPECTRALLY VARYING BRDF MATERIALS IN HYPERSPECTRAL REFLECTANCE IMAGERY Robert Sundberg, Steven Adler-Golden, Timothy Perkins and Karmon Vongsy	FPGA IMPLEMENTATION OF A MAXIMUM VOLUME ALGORITHM FOR ENDMEMBER EXTRACTION FROM HYPERSPECTRAL IMAGERY Cong Li, Lianru Gao, Antonio Plaza and Bing Zhang
15:00	DECONSTRUCTING OPTIMAL DETECTION ALGORITHMS Alan Schaum	BENCHMARKING SERVER-SIDE SOFTWARE MODULES FOR HANDLING AND PROCESSING REMOTE SENSING DATA THROUGH RASDAMAN Athanasios Karmas and Konstantinos Karantzalos
15:20	ESTIMATING TARGET SIGNATURES WITH DIVERSE DENSITY Taylor Glenn and Alina Zare	BIG DATA CHALLENGES IN CHINA CENTRE FOR RESOURCES SATELLITE DATA AND APPLICATION Jun Shao, Daqi Xu, Chun Feng and Mingmin Chi
15:40	SPARSITY-BASED OPTIMAL TARGETS SPECTRA GENERATION METHOD Ting Wang and Hui Lin	MULTIPLE STRATIFIED SAMPLING STRATEGY FOR ASSESSING THE BIG REMOTE SENSING PRODUCTS Huan Xie, Xiaohua Tong, Wen Meng, Fang Wang and Xiong Xu
16:00		
16:00 16:30	coffee break	
16:30 Oral until 18:10	<b>Session wed-o-3-a</b> <b>Spectral unmixing (1) - Sparse Regression</b> Session chairs : Jean-Yves Tournieret, <i>University of Toulouse, France</i> Rob Heylen, <i>University of Antwerp, Belgium</i>	<b>Session wed-o-3-b</b> <b>A diversity of applications</b> Session chairs : Michael Sears, <i>University of the Witwatersrand, South Africa</i> Kuniaki Uto, <i>Tokyo Institute of Technology, Japan</i>
16:30	LINEAR SPECTRAL UNMIXING USING COLLABORATIVE SPARSE REGRESSION AND CORRELATED SUPPORTS Yoann Altmann, Marcelo Pereyra and Jose M. Bioucas Dias	DETECTION OF BLACK MOLD INFECTED FIGS BY USING TRANSMITTANCE SPECTROSCOPY Efkan Durmuş, Ahmet Seçkin Bilgi, Gizem Ortaç, Habil Kalkan and Kadim Taşdemir
16:50	PERFORMANCE GUARANTEES FOR SPARSE REGRESSION-BASED UNMIXING Yuki Itoh, Marco F. Duarte and Mario Parente	JOINT ESTIMATION OF WATER COLUMN PARAMETERS AND SEABED REFLECTANCE COMBINING MAXIMUM LIKELIHOOD AND UNMIXING ALGORITHM Mireille Guillaume, Yves Michels and Sylvain Jay
17:10	POTENTIAL AND LIMITATIONS OF BAND SELECTION AND LIBRARY PRUNING IN SPARSE HYPERSPECTRAL UNMIXING Marian-Daniel Iordache, Jose Bioucas-Dias and Antonio Plaza	MULTIPLE OBJECT TRACKING WITH BACKGROUND ESTIMATION IN HYPERSPECTRAL VIDEO SEQUENCES Zacharias Kandylakis, Konstantinos Karantzalos, Anastasios Doulamis and Nikos Doulamis
17:30	HYPERSPECTRAL IMAGE UNMIXING VIA SIMULTANEOUSLY SPARSE AND LOW RANK ABUNDANCE MATRIX ESTIMATION Paris Giampouras, Kostantinos Themelis, Athanasios Rontogiannis and Konstantinos Koutroumbas	CHARACTERIZATION OF FINE METAL PARTICLES USING HYPERSPECTRAL IMAGING IN AUTOMATIC WEEE RECYCLING SYSTEMS Gabriele Candiani, Nicoletta Picone, Loredana Pompilio, Monica Pepe and Marcello Colledani
17:50	HYPERSPECTRAL CHANGE DETECTION BY SPARSE UNMIXING WITH DICTIONARY PRUNING	PROSPECTING FOR HYDROTHERMAL MINERAL DEPOSITS IN THE HIMALAYA USING SHORT-WAVE INFRARED SPECTROSCOPY
18:10	Alp Ertürk, Marian-Daniel Iordache and Antonio Plaza	Himanshu Govil

w h i s p e r s

## Thursday, 4, June Overview

9:00 Opening of the conference

9:00

### Plenary 2

#### Hyperspectral Remote Sensing for Agro-Environmental Information

Yoshio Inoue, *Ecosystem Informatics Division, National Institute for Agro-Environmental Sciences, Japan*

Session chair: Kuniaki Uto, *Tokyo Institute of Technology, Japan*

10:00

10:00

#### Session thu-p-a Planetary exploration

Session chairs :

Lianru Gao, *RADI, Chinese Academy of Sciences*

Akira Iwasaki, *University of Tokyo, Japan*

#### Session thu-p-b

#### A diversity of applications

Session chairs :

Gabriele Candiani, *IREA - National Research Council, Italy*

Naoto Yokoya, *University of Tokyo, Japan*

11:00

11:00

#### Session thu-o-1-a Agricultural and ecological systems

Session chairs :

Bing Zhang, *RADI, Chinese Academy of Sciences*

Mireille Guillaume, *Institut Fresnel, France*

#### Session thu-o-1-b

#### Classification (2)

Session chairs :

Peijun Du, *Nanjing University, China*

Daniele Cerra, *DLR, Germany*

12:40

12:40

Lunch

13:40

#### Session thu-o-2-a Hyperspectral pansharpening and fusion (1)

Session chairs :

José M. Bioucas-Dias, *Instituto Superior Tecnico, Portugal*

Nicolas Dobigeon, *University of Toulouse, France*

#### Session thu-o-2-b

#### Forward modeling and atmospheric compensation

Session chairs :

Robert Sundberg, *Spectral Sciences, Inc., USA*

Yi Cen, *RADI, Chinese Academy of Sciences*

15:20

15:20

Coffee

15:50

#### Session thu-o-3-a Spectral unmixing (2)

Session chairs :

Wing-Kin Ma, *The Chinese University of Hong Kong, Hong Kong SAR*

17:30

Rob Heylen, *University of Antwerp, Belgium*

#### Session thu-o-3-b

#### Thermal hyperspectral imaging

Session chairs :

Lifu Zhang, *Institute of Remote Sensing and Digital Earth, CAS*

Manuel Cubero-Castan, *EPFL, Switzerland*

18:30

Banquet, Hotel Chinzanso Tokyo

22:00

whispers

Thursday, 4, June

9:00 Opening of the conference

9:00

### Plenary 2

#### Hyperspectral Remote Sensing for Agro-Environmental Information

Yoshio Inoue, *Ecosystem Informatics Division, National Institute for Agro-Environmental Sciences, Japan*

Session chair: Kuniaki Uto, *Tokyo Institute of Technology, Japan*

10:00

10:00 Posters / coffee break : 2 parallel sessions

Poster until  
11:00

### Session thu-p-a Planetary exploration

Session chairs :

Lianru Gao, *RADI, Chinese Academy of Sciences*

Akira Iwasaki, *University of Tokyo, Japan*

SPIN-FORBIDDEN PYROXENE ABSORPTIONS IN THE VIR-SPECTRA OF 4VESTA

Katrin Stephan, Ralf Jaumann, Maria Cristina De Sanctis, Eleonora Ammannito, Thomas Roatsch, Klaus-Dieter Matz, Lucy A. McFadden, Rachel Klima, Carol A. Raymond and Chris T. Russell

IDENTIFICATION OF CRATERS ON LUNAR SURFACE USING HYPERSPECTRAL CHANDRAYAN DATA

Vishal Saini and Ajay Kumar Patel

CHARACTERIZING DARK SPECTRA IN MERCURY SURFACE OBSERVATIONS BY NONLINEAR HYPERSPECTRAL MODELING

Andrea Marinoni, Rachel Klima and Paolo Gamba

ABUNDANCE RETRIEVAL OF HYDROUS MINERALS AROUND THE MARS SCIENCE LABORATORY LANDING SITE

Xia Zhang, Tong Shuai and Honglei Lin

IDENTIFY ANOMALY COMPONENT BY SPARSITY AND LOW RANK

Wei Wang, Shuangjiang Li, Hairong Qi, Bulent Ayhan, Chiman Kwan and Steven Vance

NON-LINEAR SPECTRAL UNMIXING OF MOON MINERALOGY MAPPER (M3) DATA

Keshav Dev Singh and Ramakrishnan Desikan

### Session thu-p-b A diversity of applications

Session chairs :

Gabriele Candiani, *IREA - National Research Council, Italy*

Naoto Yokoya, *University of Tokyo, Japan*

IMPROVEMENT OF LINEAR SPECTRAL EMISSIVITY CONSTRAINT METHOD FOR TEMPERATURE AND EMISSIVITY SEPARATION OF HYPERSPECTRAL THERMAL INFRARED DATA

Li Ni, Hua Wu, Bing Zhang, Wenjuan Zhang and Lianru Gao

COMPARATIVE ANALYSIS OF THE HYPERSPECTRAL VEGETATION INDEX AND RADAR VEGETATION INDEX: A NOVEL FUSION VEGETATION INDEX

Yong-Hyun Kim, Jae-Hong Oh, Jae-Wan Choi and Yong-Il Kim

HYPERSPECTRAL IMAGING SYSTEM FOR DETECTION OF DRIED FIGSWITH BLACK MOLD

Gizem Ortaç, Kadim Taşdemir, Ahmet Seçkin Bilgi, Efsan Durmuş and Habil Kalkan

NONDESTRUCTIVE MONITORING OF CHICKEN MEAT FRESHNESS USING HYPERSPECTRAL IMAGING TECHNOLOGY

Xujun Ye, Kanako Iino, Shuhuai Zhang and Seiichi Oshita

EVALUATING DIFFERENT VEGETATION INDEX FOR ESTIMATING LAI OF WINTER WHEAT USING HYPERSPECTRAL REMOTE SENSING DATA

Jingguo Tian, Shudong Wang and Lifu Zhang

IMPACT OF HYBRID PANSHARPENING APPROACHES APPLIED TO HYPERSPECTRAL IMAGES

Giorgio Licciardi, Miguel Ángel Veganzones, Gemine Vivone, Laetitia Loncan and Jocelyn Chanussot

w h i s p e r s

Thursday, 4, June

Poster until  
11:00

METHOD FOR TIME SERIES EXTRACTION OF CHARACTERISTIC PARAMETERS FROM MULTI-DIMENSIONAL REMOTE SENSING DATASETS  
Lifu Zhang, Hao Chen, Dongjie Fu, Taixia Wu, Jia Liu and Changping Huang

CHESRE: A COMPREHENSIVE PUBLIC HYPER-SPECTRAL EXPERIMENTAL SITE AND DATA SET FOR RESOURCES EXPLORATION  
Fuping Gan, Shuneng Liang, Peijun Du, Fuxing Dang, Kun Tan, Hongjun Su and Zhaohui Xue

A NOVEL DYNAMIC CLASSIFIER ENSEMBLE ALGORITHM FOR HYPER-SPECTRAL IMAGE CLASSIFICATION  
Hongjun Su and Peijun Du

SPATIAL-TEMPORAL INFORMATION EXTRACTION FOR VEGETATION PHENOLOGY VARIATION BASED ON MODIS NDVI DATASETS IN THE TIBETAN PLATEAU

Yi Cen, Guibin Hao, Lifu Zhang, Bo Wu, Dongjie Fu, Xuejian Sun and Changping Huang

SPECIFIC BAND RATIO FOR VEGETATION INDICES CALCULATION IN HYPER-SPECTRAL IMAGES  
Büşra Özbay, Yunus Emre Esin and Furkan Çengel

DECOMPOSING THE CONTRIBUTION OF FOLIAR NITROGEN CONTENT AND CANOPY STRUCTURAL PROPERTIES IN THE REFLECTANCE SPECTRA OF CEREAL CROPS  
Tao Cheng, Dong Li, Siyao Chen, Xia Yao, Yongchao Tian, Yan Zhu, Weixing Cao

11:00

11:00  
Oral until  
12:40

**Session thu-o-1-a**  
**Application of hyperspectral imaging on agricultural and ecological systems**

Session chairs :  
Bing Zhang, *RADI, Chinese Academy of Sciences*  
Mireille Guillaume, *Institut Fresnel, France*

**Session thu-o-1-b**  
**Classification (2)**

Session chairs :  
Peijun Du, *Nanjing University, China*  
Daniele Cerra, *DLR, Germany*

11:00 CROP AND FOREST ACREAGE ESTIMATION USING EXPERT SYSTEM BASED KNOWLEDGE CLASSIFIER APPROACH  
Sandip Thorat, Yogesh Rajendra, K. V. Kale and Suresh Mehrotra

EXTENDED MORPHOLOGICAL PROFILES WITH DUALITY FOR HYPER-SPECTRAL IMAGE CLASSIFICATION  
Farid Imran and Mingyi He

11:20 OPTIMIZED FEATURE FUSION OF LIDAR AND HYPER-SPECTRAL DATA FOR TREE SPECIES MAPPING IN CLOSED FOREST CANOPIES  
Frieke Van Coillie, Wenzhi Liao, Pieter Kempeneers, Kris Vandekerckhove, Sidharta Gautama, Wilfried Philips and Robert De Wulf

ROBUST HYPER-SPECTRAL IMAGE CLASSIFICATION WITH REJECTION FIELDS  
Filipe Condessa, Jelena Kovacevic and Jose Bioucas-Dias

11:40 SEMI-BLIND SOURCE SEPARATION FOR ESTIMATION OF CLAY CONTENT OVER SEMI-VEGETATED AREAS, FROM VNIR/SWIR HYPER-SPECTRAL AIRBORNE DATA  
Walid Ouerghemmi, Cécile Gomez, Mohamed Saber Naceur and Philippe Lagacherie

SPECTRAL-SPATIAL CLUSTERING OF HYPER-SPECTRAL REMOTE SENSING IMAGE WITH SPARSE SUBSPACE CLUSTERING MODEL  
Han Zhai, Hongyan Zhang, Liangpei Zhang, Pingxiang Li and Xiong Xu

12:00 OPTIMAL HYPER-SPECTRAL CLASSIFICATION FOR PADDY FIELD WITH SEMISUPERVISED SELF-LEARNING  
Taichi Takayama, Naoto Yokoya and Akira Iwasaki

NON-LOCAL SUB-PIXEL MAPPING FOR HYPER-SPECTRAL IMAGERY  
Yanfei Zhong, Yunyun Wu, Ruyi Feng, Xiong Xu and Liangpei Zhang

12:20 AN ANALYSIS OF SHADOW EFFECTS ON SPECTRAL VEGETATION INDICES USING A GROUND-BASED IMAGING SPECTROMETER  
Taixia Wu, Lifu Zhang and Changping Huang

REPRESENTATION-BASED CLASSIFICATION FOR HYPER-SPECTRAL IMAGERY: AN ELASTIC NET REGULARIZATION APPROACH  
Wei Li, Lan Chang and Qian Du

12:40

12:40 Lunch

13:40

wh i s p e r s

# Thursday, 4, June

13:40 Oral until 15:20	<b>Session thu-o-2-a</b> <b>Hyperspectral pansharpening and fusion (1)</b> Session chairs : José M. Bioucas-Dias, <i>Instituto Superior Tecnico, Portugal</i> Nicolas Dobigeon, <i>University of Toulouse, France</i>	<b>Session thu-o-2-b</b> <b>Forward modeling and atmospheric compensation</b> Session chairs : Robert Sundberg, <i>Spectral Sciences, Inc., USA</i> Yi Cen, <i>RADI, Chinese Academy of Sciences</i>
13:40	HYPERSPECTRAL AND MULTISPECTRAL IMAGE FUSION BASED ON CONSTRAINED CNMF UNMIXING Yifan Zhang, Yang Liu, Yan Gao and Mingyi He	INVESTIGATING FRAUNHOFER LINE BASED FLUORESCENCE RETRIEVAL IN O2-B BAND WITH HYPER-SPECTRAL RADIATIVE TRANSFER SIMULATIONS Changping Huang, Lifu Zhang, Yi Cen and Qingxi Ton
14:00	DYNAMIC DICTIONARY LEARNING STRATEGIES FOR SPARSE REPRESENTATION BASED HYPER-SPECTRAL IMAGE ENHANCEMENT Claas Grohnfeldt, Tristan Michael Burns and Xiao Xiang Zhu	A NEW SMOOTHNESS BASED STRATEGY FOR SEMI-SUPERVISED ATMOSPHERIC CORRECTION: APPLICATION TO THE LÉMAN-BAÏKAL CAMPAIGN Manuel Cubero-Castan, Dragos Constantin, Kevin Barbieux, Vincent Nouchi, Yosef Akhtman and Bertrand Merminod
14:20	BAYESIAN FUSION OF MULTISPECTRAL AND HYPER-SPECTRAL IMAGES USING A BLOCK COORDINATE DESCENT METHOD Qi Wei, Nicolas Dobigeon and Jean-Yves Tourneret	HT-FRTC: A FAST RADIATIVE TRANSFER CODE USING KERNEL REGRESSION Jean-Claude Thelen and Stephan Havemann
14:40	HYPERSPECTRAL PANSHARPENING BASED ON UNMIXING TECHNIQUES Laëtitia Loncan, Jocelyn Chanussot, Sophie Fabre and Xavier Briottet	A METHOD FOR ATMOSPHERIC PARAMETERS AND SURFACE REFLECTANCE RETRIEVAL FROM HYPER-SPECTRAL REMOTE SENSING DATA Yaokai Liu, Ning Wang, Lingling Ma, Chuanrong Li and Lingli Tang
15:00	IMPROVING THE SPATIAL RESOLUTION OF HYPER-SPECTRAL IMAGE USING PANCHROMATIC AND MULTISPECTRAL IMAGES: AN INTEGRATED METHOD Xiangchao Meng, Huanfeng Shen, Huifang Li & Liangpei Zhang	A SPECTRAL-CORRELATION-BASED EMISSIVITY IMAGE SIMULATION METHOD FOR THE 2.7 MICRON ABSORPTION BANDS Yao Liu, Wenjuan Zhang, Bing Zhang and Li Ni
15:20	Coffee	
15:20 15:50		
15:50 Oral until 17:30	<b>Session thu-o-3-a</b> <b>Spectral unmixing (2) - Data driven approach -</b> Session chairs : Wing-Kin Ma, <i>The Chinese Univ. of Hong Kong, Hong Kong SAR</i> Rob Heylen, <i>University of Antwerp, Belgium</i>	<b>Session thu-o-3-b</b> <b>Thermal hyperspectral imaging</b> Session chairs : Lifu Zhang, <i>Institute of Remote Sensing and Digital Earth, CAS</i> Manuel Cubero-Castan, <i>EPFL, Switzerland</i>
15:50	SWARM INTELLIGENCE: A RELIABLE SOLUTION FOR EXTRACTING ENDMEMBERS FROM HYPER-SPECTRAL IMAGERY Bing Zhang, Lianru Gao, Xu Sun and Lina Zhuang	COMPARISON OF RX-BASED ANOMALY DETECTORS ON SYNTHETIC AND REAL HYPER-SPECTRAL DATA Seniha Esen Yuksel and Sefa Kucuk
16:10	HYPERSPECTRAL IMAGE UNMIXING USING CASCADED AUTOENCODER Rui Guo, Wei Wang and Hairong Qi	WATER STRESS DETECTION USING HYPER-SPECTRAL THERMAL INFRARED REMOTE SENSING Max Gerhards, Gilles Rock, Martin Schlerf, Thomas Udelhoven and Willy Werner
16:30	ROBUST COLLABORATIVE NONNEGATIVE MATRIX FACTORIZATION FOR HYPER-SPECTRA UNMIXING (R-CNMF) Jun Li, Jose Bioucas Dias, Antonio Plaza and Lin Liu	STANDOFF MIDWAVE INFRARED HYPER-SPECTRAL IMAGING OF SHIP PLUMES Marc-André Gagnon, Jean-Philippe Gagnon, Pierre Tremblay, Simon Savary, Vincent Farley, Philippe Lagueux, Éric Guyot and Martin Chamberland
16:50	WHEN CAN THE MINIMUM VOLUME ENCLOSING SIMPLEX IDENTIFY THE ENDMEMBERS CORRECTLY WHEN THERE IS NO PURE PIXEL? Wing-Kin Ma, Chia-Hsiang Lin, Wei-Chiang Li and Chong-Yung Chi	HIGHLY REFLECTIVE PLATE DETECTION FROM LWIR GROUND IMAGES Poyraz Umut Hatipoglu and Levent Özparlak
17:10	GEOMETRIC SIMPLEX GROWING ALGORITHM Hsiao-Chi Li and Chein-I Chang	EVALUATION OF TEMPERATURE AND EMISSIVITY SEPARATION METHOD USING THE HYPER-SPECTRAL DATA FOR CONTRAST EMISSIVITY SURFACES Qian Yonggang, Ning Wang, Gao Caixia and Ma Lingling

## Friday, 5, June Overview

9:00 Opening of the conference

9:00

### Plenary 3

#### Intelligent Hyperspectral Remote Sensing Satellite (IHRS): A New Perspective

Bing Zhang, *Institute of Remote Sensing and Digital Earth, Chinese Academy of Sciences, Beijing, China*

Session chair: Naoto Yokoya, *University of Tokyo, Japan*

10:00

10:00 Posters / coffee break

#### Session fri-p-a Classification

Session chairs :

Alp Ertürk, *Kocaeli University, Turkey*

Guangliang Chen, *San Jose State University, USA*

#### Session fri-p-b

#### Anomaly and target detection

Session chairs :

Taichi Takayama, *University of Tokyo, Japan*

Ronny Hänsch, *Technische Universität Berlin, Germany*

11:10

11:10

#### Session fri-o-1-a

#### Hyperspectral pansharpening and fusion (2)

Session chairs :

José M. Bioucas-Dias, *Instituto Superior Tecnico, Portugal*

Nicolas Dobigeon, *University of Toulouse, France*

#### Session fri-o-1-b

#### Spectral unmixing (3) - Consideration of spatial information and nonlinearity -

Session chairs :

Sen Jia, *Shenzhen University, China*

Alina Zare, *University of Missouri, USA*

12:50

12:50 lunch

14:00

#### Session fri-o-2-a

#### Sparse reconstruction and compressive sensing

Session chairs :

Antonio Plaza, *University of Extremadura, Spain*

Xiaoxiang Zhu, *DLR & TU Munich, Germany*

#### Session fri-o-2-b

#### Machine learning

Session chairs :

Paul Scheunders, *University of Antwerp, Belgium*

Hairong Qi, *University of Tennessee, USA*

15:40

15:40 coffee

16:10

#### Session fri-o-3-a

#### Spectral unmixing (4) - Beyond endmember variability -

Session chairs :

Rob Heylen, *University of Antwerp, Belgium*

Jun Li, *Sun Yat-Sen University, China*

#### Session fri-o-3-b

#### Spaceborne hyperspectral imager

Session chairs :

Tetsushi Tachikawa, *Japan Space Systems, Japan*

Osamu Kashimura, *Japan Space Systems, Japan*

17:50

HYPER SPECTRAL IMAGE ANALYSIS USING  
MULTIFRACTAL ATTRIBUTES

Sébastien Combexelle, Herwig Wendt, Jean-Yves Tourneret, Stephen McLaughlin and Patrice Abry

COMPARING INFERENCE METHODS FOR CONDITIONAL RANDOM FIELDS FOR HYPER SPECTRAL IMAGE CLASSIFICATION

Yang Hu, Sildomar Monteiro and Eli Saber

DIMENSION REDUCTION OF HYPER SPECTRAL IMAGE WITH RARE EVENT PRESERVING

Jihan Khoder and Rafic Younes

AN ISOMAP-BASED KERNERL-KNN CLASSIFIER FOR HYPER SPECTRAL DATA ANALYSIS

Yuan Zhou, Chun Liu and Nan Li

CHROMATIC DISCRIMINATION OF IMPERVIOUS SURFACES USING ARTIFICIAL COLORS FOR HYPER SPECTRAL DATA

Shailesh Deshpande, Arun Inamdar and Harrick Vin

OBJECT-BASED FUSION OF HYPER SPECTRAL AND LIDAR DATA FOR CLASSIFICATION OF URBAN AREAS

Prashanth Marpu and Sergio Sanchez Martinez

ANISOTROPICALLY FOVEATED NONLOCAL WEIGHTS FOR JOINT SPARSE REPRESENTATION-BASED HYPER SPECTRAL CLASSIFICATION

Zhi He and Lin Liu

AUTOMATIC FRAMEWORK FOR SEMI-SUPERVISED HYPER SPECTRAL IMAGE CLASSIFICATION USING SELF-TRAINING WITH DATA EDITING

Junshu Wang, Nan Jiang, Guoming Zhang, Bin Hu and Yang Li

DISCRIMINATING MULTIPLE KERNEL LEARNING FOR JOINT CLASSIFICATION OF OPTICAL AND LIDAR DATA IN URBAN AREA

Qingwang Wang, Huan Liu and Yanfeng Gu

HYPER SPECTRAL IMAGE CLASSIFICATION USING MULTIPLE FEATURES AND NEAREST REGULARIZED SUBSPACE

Bing Peng, Xiaoming Xie, Wei Li and Qian Du

AN ACTIVE LEARNING METHOD BASED ON SVM CLASSIFIER FOR HYPER SPECTRAL IMAGES CLASSIFICATION

Shujin Sun, Ping Zhong, Huaitie Xiao, Fang Liu and Runsheng Wang

SPATIAL-SPECTRAL CLASSIFICATION WITH LOCAL REGIONAL FILTER AND MARKOV RANDOM FIELD

Qiong Ran, Wei Li and Qian Du

w h i s p e r s

Friday, 5, June

Poster until  
11:10

**Session fri-p-b  
Anomaly and target detection**

Session chairs :

Taichi Takayama, *University of Tokyo, Japan*

Ronny Hänsch, *Technische Universität Berlin, Germany*

ANOMALY DISCRIMINATION AND CLASSIFICATION FOR HYPERSPECTRAL IMAGERY

Li-Chien Lee, Drew Paylor and Chein-I Chang

DTW BASED SIGNAL ALIGNMENT FOR ENHANCING CO<sub>2</sub> DETECTION IN MWIR HYPERSPECTRAL IMAGERY  
Fatih Omruuzun, Didem Ozisik Baskurt and Yasemin Yardimci Cetin

PESTICIDE RESIDUE DETECTION BY HYPERSPECTRAL IMAGING SENSORS

Shih-Yu Chen, Yuan-Hsun Liao, Wei-Sheng Lo, Horng-Yuh Guo, Tau-Meu Chou, Chia-Hisen Wen, Chinsu Lin, Hsian-Min Chen, Yen-Chieh Ouyang, Chao-Cheng Wu and Chein-I Chang

A COMPARATIVE STUDY OF HYPERSPECTRAL ANOMALY AND SIGNATURE BASED TARGET DETECTION METHODS FOR OIL SPILLS

Hilal Soydan, Alper Koz, H. Şebnem Düzgün and Aydın Alatan

A METHOD FOR BAND REGISTRATION OF SMALL MOVING TARGET BASED ON STARRING IMAGING SPECTROMETER

Hao Ding and Huijie Zhao

PROGRESSIVE BAND PROCESSING OF AUTOMATIC TARGET GENERATION PROCESS

Yao Li, Cheng Gao and Chein-I Chang

11:10

11:10  
Oral until  
12:50

**Session fri-o-1-a  
Hyperspectral pansharpening and fusion (2)**

Session chairs :

José M. Bioucas-Dias, *Instituto Superior Tecnico, Portugal*

Nicolas Dobigeon, *University of Toulouse, France*

**Session fri-o-1-b  
Spectral unmixing (3) - Consideration of spatial information and nonlinearity -**

Session chairs :

Sen Jia, *Shenzhen University, China*

Alina Zare, *University of Missouri, USA*

11:10 JOINTLY SPATIAL-SPECTRAL RESOLUTION ENHANCEMENT OF HYPERSPECTRAL IMAGERY  
Yongqiang Zhao, Chen Yi and Jingxiang Yang

MULTIPLE GRAPH REGULARIZED NMF FOR HYPERSPECTRAL UNMIXING

Lei Tong, Jun Zhou, Yuntao Qian and Yongsheng Gao

11:30 HYPERSPECTRAL RESOLUTION ENHANCEMENT USING MULTISENSOR IMAGE DATA  
Jakub Bieniarz, Daniele Cerra, Xiaoxiang Zhu, Rupert Müller and Peter Reinartz

A SPATIAL COMPOSITIONAL MODEL FOR LINEAR UNMIXING

Yuan Zhou, Anand Rangarajan and Paul Gader

11:50 TWO-STAGE FUSION OF THERMAL HYPERSPECTRAL AND VISIBLE RGB IMAGE BY PCA AND GUIDED FILTER  
Wenzhi Liao, Xin Huang, Frieke Van Coillie, Thoonen Guy, Aleksandra Pizurica, Scheunders Paul and Wilfried Philips

HYPERSPECTRAL DATA UNMIXING WITH GRAPH-BASED REGULARIZATION

Rita Ammanouil, André Ferrari and Cédric Richard

12:10 THE ESTIMATION OF HIGH RESOLUTION URBAN SURFACE TEMPERATURE USING HYPERSPECTRAL SPECTRAL MIXTURE ANALYSIS  
Kai Liu, Hongbo Su, Weimin Wang and Xueke Li

NONLINEAR UNMIXING WITH A MULTILINEAR MIXING MODEL

Rob Heylen and Paul Scheunders

12:30 A MAP-BASED APPROACH TO RESOLUTION ENHANCEMENT OF HYPERSPECTRAL IMAGES

SPATIALLY INFORMED SPECTRAL UNMIXING

Daniel Bongiorno, Adam Fairley and Stefan Williams

12:50 Hasan Irmak, Gozde Bozdagi Akar and Seniha Esen Yuksel

w h i s p e r s

Friday, 5, June

12:50 Lunch

14:00

14:00

## 8. PLENARY SPEAKERS

### PLENARY 1 (Wednesday, 3, June, 9:20)

#### APPLYING GAME THEORY TO HYPERSPECTRAL IMAGE ANALYSIS WITH APPLICATIONS TO VEGETATIVE GROUND COVER MAPPING

Lori M. Bruce, *Mississippi State University, USA*

#### Abstract:

In the discipline of information analysis and decision making, game theory is one of the most mature fields, with well-defined and proven mathematical models. As a mathematical tool, game theory has mostly been used to support decision-making in the field of economics. Game theory describes how players accumulate benefits for themselves by employing appropriate strategies in a competitive or cooperative activity where many players participate. Game theory, and its mathematical models, can be applied to many areas of decision making in hyperspectral remote sensing. These include campaign planning, routing/mapping sensors, data fusion, feature selection, and classification.

This talk will introduce the basic concepts of game theory and outline the mechanisms for applying game theory models to hyperspectral image analysis, with special emphasis on data reduction, automated pixel classification, and ground cover mapping. General strategies will be outlined and details of practical implementations will be provided. The talk will include the demonstration of applying game theory methods to hyperspectral imagery for a variety of agricultural and environmental applications, including vegetative species mapping and vegetative stress characterization. Details will also be provided regarding the field campaigns and airborne image collection for the imagery used in these studies.

#### Biography :

Lori Mann Bruce received the B.S.E., Masters, and Ph.D. degrees in electrical and computer engineering from the University of Alabama, Huntsville, and the Georgia Institute of Technology in 1991, 1992, and 1996, respectively. Dr. Bruce is currently a Giles Distinguished Professor of electrical and computer engineering and the Associate Vice President for Academic Affairs and Dean of the Graduate School at Mississippi State University. As Dean, she is responsible for providing leadership and academic oversight for the approximately 3500 graduate students enrolled in more than 160 graduate programs.

Prior to her current position, Dr. Bruce has served as Associate Dean for Research and Graduate Studies in the Bagley College of Engineering, Associate Director of the Geosystems Research Institute and Professor of Electrical and Computer Engineering. As a faculty member, her research endeavors have been focused on advanced digital signal processing methodologies for exploitation of high-dimensional datasets, with particular emphasis on hyperspectral remote sensing. She has served as the Principal Investigator (PI) or Co-PI on more than 20 funded research grants and contracts, totaling approximately \$20 million from federal agencies. As a faculty member, she has taught 45 sections of 17 different engineering courses and has successfully advised, as major professor or thesis/dissertation committee member, 75 Ph.D. and Master's students. Her research has resulted in over 130 refereed publications.

Dr. Bruce is originally from Flintville, TN. She is married to Dr. J.W. Bruce and has one son, Walker Bruce.

**PLENARY 2 (Thursday, 4, June, 9:00)****HYPERSPECTRAL REMOTE SENSING FOR AGRO-ENVIRONMENTAL INFORMATION**

Yoshio Inoue, *Ecosystem Informatics Division, National Institute for Agro-Environmental Sciences, Japan*

**Abstract:**

Timely and geospatial information on agro-ecosystems is critical for diagnosis and decision making for precision crop management as well as for food and environmental security. Remote sensing using optical, thermal and microwave sensors has a vital role for non-destructive, geospatial and systematic assessment of agro-ecosystem dynamics. However, under open-field and/or ecosystem conditions, it is a challenging task to extract accurate biophysical and ecophysiological information of ecosystems consisting of mixed soil and plant elements such as leaves, stems and ears under the changing environment (illumination, etc.). Therefore, advanced sensors as well as accurate, robust, and simple algorithms are strongly required for such applications. In this paper, results of comprehensive spectral analysis and case studies will be presented. Spectral datasets obtained by ground-based hyperspectral sensors, airborne hyperspectral sensors, high-resolution satellite optical sensors are analyzed using several methods; 1) simple spectral index approaches, 2) multivariable statistical regression models, and 3) physically-based reflectance models. Methodologies for utilization of hyperspectral data as well as several robust algorithms for hyperspectral assessment of key ecophysiological variables will be presented. Some general insights on the advantage, disadvantage, and desirable specifications of sensors for such applications will also be discussed. Information-based smart agriculture is one of the major operational applications for hyperspectral remote sensing.

**Biography :**

Dr. Yoshio Inoue is a senior research scientist in the National Institute for Agro-Environmental Sciences, Japan. He received the Doctoral Degree in plant ecophysiology from the Kyoto University in 1988. The major part of present research is related to remote sensing and geospatial information for agricultural and natural resource managements, especially from biophysical and physiological points of view at the scales from a leaf to region. He has made a wide range of basic and applied studies for estimation of key variables in soil-plant-atmosphere systems such as stomatal conductance, chlorophyll and water contents, transpiration and CO<sub>2</sub> fluxes, plant growth. These works are mostly based on experimental investigations using optical, thermal and microwave remote sensing sensors on ground-based, airborne and space-borne platforms, as well as using micrometeorological and physiological instruments. The synergistic linkage of remotely-sensed data with process-based models such as growth and biophysical models is also employed for prediction of ecosystem dynamics. One of major operational applications of these studies is information-based smart agriculture. He served as a Professor at the Graduate School of Life & Environmental Sciences, University of Tsukuba from 1995 to 2015. He has been contributing to both domestic and international research communities as editor-in-chief, editor and/or reviewer of more than 60 journals.

His scientific activities and achievements are summarized at <http://cse.niaes.affrc.go.jp/yinoue/>.

**PLENARY 3 (Friday, 5, June, 9:00)****INTELLIGENT HYPERSPECTRAL REMOTE SENSING SATELLITE (IHRS): A NEW PERSPECTIVE**

Bing Zhang, *Institute of Remote Sensing and Digital Earth, Chinese Academy of Sciences, Beijing, China*

**Abstract:**

The intelligent hyperspectral remote sensing (IHRS) is a new perspective for an Earth Observation (EO) satellite system. This plenary talk will review the main characteristics of the IHRS system that is currently in the early stages of development. The technical design of the system will include the following characteristics: 1) a fore-field pre-judgment sensor for regional background information acquisition, which will enforce the capacity of the system to adapt to different scenarios and problems; 2) an advanced and adjustable hyperspectral sensor, which will be able to provide detailed surface observations using optimum data acquisition parameters; and 3) an onboard real-time data processing and analysis subsystem, with the capacity to provide real-time remote sensing products. These characteristics, which will be discussed in detail in the plenary talk, are completely innovative with regards to the specifications of available hyperspectral imaging systems. The IHRS calls for cutting-edge research on frontier scientific theories and key technologies in order to realize a leap-forward development in the field of hyperspectral remote sensing.

**Biography :**

Prof. Bing Zhang is a Full Professor and the Deputy Director of the Institute of Remote Sensing and Digital Earth, Chinese Academy of Sciences, where he has been leading key scientific projects in the area of hyperspectral remote sensing for more than 20 years. His research interests include the development of Mathematical and Physical models and image processing software for the analysis of hyperspectral remote sensing data in many different areas, such as geology, hydrology, ecology and botany. Prof. Zhang has authored or co-authored around 150 publications, including more than 100 journal citation reports (JCR) papers and more than 50 peer-reviewed international conference papers. Prof. Zhang is the author of 4 books on hyperspectral remote sensing, including *Hyperspectral Remote Sensing*, *Hyperspectral Image Classification and Target Detection*, *Hyperspectral Remote Sensing for Inland Water*, and *Hyperspectral Remote Sensing and its Multidisciplinary Applications*, which serve as the main materials for education and research in hyperspectral remote sensing in China. He is currently focused on the development of the intelligent hyperspectral remote sensing (IHRS) satellite, which is a new Earth Observation (EO) system aiming at providing adaptive real-time EO and monitoring. Prof. Zhang is a Senior Member of IEEE and an Associate Editor of the IEEE Journal of Selected Topics in Applied Earth Observations in Remote Sensing (JSTARS). He has been guest editor of several special issues, including a JSTARS special issue on *Hyperspectral Remote Sensing: Theory, Methods, and Applications*, or a JSTARS special issue on *Big Data in Remote Sensing*, among others.
